

## 9 simple steps to your Target Solar Energy System

From start to finish, these are the steps to get your Target Solar System up and running.

### Step 1: Quote Acceptance

- Sign your contract
- Send signed documents along with copy of your electricity bill to Target Solar by email.
- Arrange payment of your deposit as mentioned in contract.

### Step 2: Target Solar manages your Pre-approval Process

- Target Solar manages all contact with the energy utility on your behalf, to save you the hassle.
- Your energy retailer may contact you during this stage to confirm your account details.
- We may need to contact your energy distributor during this step if the utility asks for more information.

### Step 3: Target Solar Schedules your Installation

- Once preapproved by the utility, installation of your solar system can be scheduled.
- Target Solar will contact you to confirm an installation date.

### Step 4: Installation Day

- Installation of your Target Solar System will be completed by qualified electricians who are Clean Energy Council Certified.
- The installer shall provide you all the necessary information and knowledge about your system.

### Step 5: Meter Upgrade

- Target Solar shall apply for your meter upgrade with the meter provider on your behalf.
- You will receive a separate invoice for this installation direct from the meter provider.
- Following your meter upgrade, switch on your system

### Step 6: Make the payment

- Customer needs to make the payment within **2 days** of installation

### Step 7: Target Solar after service support.

- Our installer/ sales rep shall give you all the necessary information about the system and WIFI monitoring
- For any enquiry/further assistance, please call **1300-7-76527** or email us at **info@targetsolar.com.au**

### Step 8: Feedback and Testimonials.

- Your feedback is valuable to us.
- Please provide your comments on our Facebook page @targetsolarau
